PropGOTO Integration Capabilities

PropGOTO delivers a unified, end-to-end ecosystem with deep integration across CRM, ERP, financial systems, IoT, and third-party applications, ensuring automation, interoperability, and compliance across the real estate lifecycle.

Revenue & Growth

Sales & Listings: Integration with PropGOTO CRM modules, ERP, and external CRMs/partners. Open APIs enable linkage with financial systems and payment gateways for automated contracts and faster deal closures.

Brokerage Management: Connectivity with Zoho Books, Tally, NetSuite, Dynamics 365 for inventory, commissions, and accounting.

Portfolio & Occupancy Management

Lease Management: Integration with social channels (LinkedIn, WhatsApp, Instagram), ERP systems, and financial/payment gateways for full-cycle contract and inventory updates.

Stay Management: Interoperability with Booking.com, Airbnb, Expedia, hotel PMS, and IoT-enabled check-in/out devices.

Cowork Management: Integration with visitor/parking systems, access control, meeting room devices, mobile apps, and PropGOTO lease modules.

AI-Powered Solutions

AgentGOTO, Sales AI, Maintenance AI: Integration with CRM, marketing, IoT (HVAC, lighting, leak sensors, smart meters), communication tools, and financial systems (QuickBooks, Zoho, SAP, Oracle NetSuite). Enables predictive maintenance, automated sales follow-ups, and optimized operations.

Community Experience

Community & HOA Management: Integration with accounting payment systems, mobile apps, visitor and parking solutions for complete society/HOA administration.

Visitor & Parking: Integration with gate/access control, IoT devices, mobile apps, and FacilitiesGOTO modules.

Township Management: Integration with ERP/accounting (QuickBooks, Sage, Oracle), utility metering/payment systems, BMS/IoT, access control, and mobile/field apps.

Energy & Utility: Integration with utility providers, smart meters, billing/invoice systems, ESG and compliance platforms.

IoT & Smart Building

IoT Sense: Integration with BMS/BAS, IoT platforms, ESG systems, smart meters, utility providers, ERP/accounting software, and third-party devices for smart, sustainable, and secure properties.

Asset Performance

Facilities Management (CAFM/CMMS): Integration with ERP systems (Odoo, Zoho, MS D365), IoT/BMS for ESG compliance, utilities, access, and surveillance systems.

Service Management: Integration with calendars, scheduling tools, accounting (Tally, Zoho Books, QuickBooks), HVAC sensors, and energy management systems.

Workplace Management (CWMS): Connectivity with calendars, access security systems, expense/billing, visitor/parking systems, and employee mobile apps.

Key Value:

PropGOTO ensures automation, compliance, and seamless workflows through enterprise-grade interoperability, third-party system compatibility, and device-driven integrations—covering the entire property lifecycle.
